

Want an easy way to add impact to your holiday program? Grow your existing frame tree!

Make a dramatic holiday statement this year by increasing the size of your Natural or Eco Pine tree. Becker Group makes it easy to “grow” your tree, simply add our patented heavy duty metal base rings and pre-lit pine branches. Each tree ring adds two feet of height to the original tree. By simply using the 2’ increments you can change a 14’ tree to a towering 100’ tall show stopper!

“Growing” your tree

No modifications are needed to your existing tree. Just buy the number of rings needed to take your tree to the next level and build as usual.

Contact a Becker Group merchandising sales consultant for more details.
